## **IN THE CLAIMS**

Please amend claims 11-13 as indicated below.

Please add new claims 14-17 as indicated below.

This listing of claims below will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1. (Original) An oligoribonucleotide or peptide nucleic acid which sequence-specifically binds to the RNA of a hepatitis C virus (HCV).
- 2. (Original) The oligoribonucleotide or peptide nucleic acid according to Claim 1 which hybridizes with the RNA of HCV under stringent conditions.
- 3. (Original) The oligoribonucleotide or peptide nucleic acid according to Claim 1 characterized in that the oligoribonucleotide or peptide nucleic acid hybridizes with the sequence of a 5' non-coding region of the RNA of HCV.
- 4. (Original) The oligoribonucleotide or peptide nucleic acid according to Claim 1 characterized in that the oligoribonucleotide or peptide nucleic acid hybridizes with the sequence of a highly identical region of the genetic sequences of a plurality of types of HCV different in genotype.
- 5. (Original) The oligoribonucleotide or peptide nucleic acid according to Claim 1 which is a double-stranded RNA.
- 6. (Original) The oligoribonucleotide or peptide nucleic acid according to Claim 1 which has a chain length of 19 to 23 bp.
- 7. (Original) An oligoribonucleotide having a nucleotide sequence shown in any one of SEQ ID Nos. 20 to 34.

- 8. (Original) An oligoribonucleotide which hybridizes under stringent conditions either with an RNA region of HCV having a sequence complementary to the oligoribonucleotide according to Claim 7 or an RNA region of HCV hybridizing under stringent conditions with said oligoribonucleotide.
- 9. (Original) An oligoribonucleotide represented by a nucleotide sequence consisting of 19 to 23 contiguous bases in any one of the nucleotide sequences shown in SEQ ID Nos. 47 to 55.
- 10. (Original) An oligoribonucleotide which hybridizes under stringent conditions either with an RNA region of HCV having a sequence complementary to the oligoribonucleotide according to Claim 9 or an RNA region of HCV hybridizing under stringent conditions with said oligoribonucleotide.
- 11. (Currently Amended) A vector which expresses the oligoribonucleotide according to any one of Claims 1 to 10 Claim 1.
- 12. (Currently Amended) A therapeutic agent for hepatitis C containing as an active ingredient the oligoribonucleotide or peptide nucleic acid according to any one of Claims 1 to 10 Claim 1 or the vector according to Claim 11.
- 13. (Currently Amended) A method of inhibiting replication ability of HCV by allowing the oligoribonucleotide or peptide nucleic acid according to any one of Claims 1 to 10 Claim 1 to bind to the HCV-RNA.
- 14. (New) A vector which expresses the oligoribonucleotide according to Claim 9.
- 15. (New) A therapeutic agent for hepatitis C containing as an active ingredient the oligoribonucleotide or peptide nucleic acid according to Claim 9.
- 16. (New) A therapeutic agent for hepatitis C containing as an active ingredient the oligoribonucleotide or peptide nucleic acid according to the vector according to Claim 11.

17. (New) A method of inhibiting replication ability of HCV by allowing the oligoribonucleotide or peptide nucleic acid according to Claim 9.
